Computer Science, Leadership
Minor

Skill Set

Front-End: HTML5, CSS3, ES6,jQuery, Typescript
Frameworks: Angular2, React, Redux, Bootstrap
Back-End: NodeJs,Express,Heroku, NoSQL, Mongoose, MySQL, PHP
Other: JIRA, Git, Datastructures, Collision Detection, Linear Algebra

Objective

Creating a memorable and pleasurable online experience that will entice users to return, while writing clean, efficient, and reusable code.

About me

I am a self-taught Full-Stack Developer, who is always trying to learn more to write cleaner and more efficient code. I place high emphasis on knowing about the why behind the how.

"Stay Hungry. Stay Foolish"
-Steve Jobs

Portfolio

YelpCamp
http://bit.ly/yelpcamp
Full-Stack project with RESTful routing, NoSQL, Express, EJS , and Authentication

ngProject
https://mszauer.github.io/ngProject/
Front-End blog-like SPA with RESTful routing through a mock database via API calls.

Where To Now

I am currently working on creating more portfolio pieces, starting with a Mobile Angular piece. Following that my goal will be to create an application using the LAMP stack.
